

I would very much appreciate a paper copy of the OWTS Policy and SED documents.

I am disappointed that there has been no public information on this policy in our area, the foothills, regarding the Public Comment dates of these proposed regulations. There is minimal access to media in general.

Since septic systems are prevalent in the foothills I would think that a workshop or other means of informing locals would have been a priority.

I have a larger than minimum septic tank and my home is on 16 acres and not nearer than 3 or 4 miles to any water source. The septic system service lasts for more than 5 years.

Also, we do not have aquifers here but fractures.

Thank you, Jill North 20055 East Clinton Rd. Jackson CA 95642
